

CONSTRUCTION EQUIPMENT

PALLET TRUCK

Our manual handling pallet truck is an excellent complement to be used together with the cable facade service lift and unloading platforms.

It includes a hydraulic piston for the pallet elevation, and the back pneumatic wheels are all-terrain.

Extremely appropriate for pallet delivering in uneven surfaces

MODEL	TMT 1200	TMT 1000
Maximum load (kg)	1500	1000
Maximum goods elevation (cm)	20	200
Useful inside width (cm)	124	124
Width (cm)	160	135
Length (cm)	140	140
Height (cm)	110	110
Weight (kg)	163	160
